Time Attendance & Access Control System

Access Control Installation:

Access Control Functions:

1. Door State Check:

The device can check door state and give warning if door is open, which effectively avoids potential safety hazard.

2. Unlock Combination:

You can divide users into maximum 30 groups and set at most 5 users from 5 different groups verifying together to unlock door.

3. Duress Alarm:

If user is forced to open door, he/she can verify by registered "Duress Fingerprint" to send alarm secretly to remote alarm system for help.

4. Dismantle Proof Alarm:

The system will send signal to external alarm for alert if sabotage and dismantle of device happen.

5. Fire Alarm Input and Output:

The device can connect to external fire alarm sensor. If fire occurs, it can give out alarm and open door automatically to make it easy for escape.

6. Multiple unlock time zones:

Maximum 50 time zones are available to set. Each user can have maximum 6 different time zones per day to unlock door.

7. Back Wiring Design:

All interfaces are located on rear panel to avoid dismantle of power or other connections.
